HEATING & AIR CONDITIONING TECHNOLOGY

2024-2025

Heating & Air Conditioning Technology is developed for students interested in careers in the heating, ventilation, air conditioning, refrigeration, and piping industry. There is an increasing demand for trained technicians in this industry. The program will help students develop skills to renovate, convert, and service HVAC/R and piping equipment.

Program Highlights:

- Design, fabricate, and install heating, ventilation, air conditioning, and refrigeration systems
- Plan, manage and complete residential and commercial projects in the community
- Utilize professional tools and equipment to diagnose and repair advanced systems

The Program Focuses on the Following State Approved Courses:

- Construction Technology Core and Sustainable Construction
- Sheet Metal
- Heating and Cooling Systems

- HVAC Refrigeration
- Mechanical, Electrical and Plumbing Systems
