

WELDING

2024-2025

Welding students become proficient in performing welding processes, reading blueprints and welding symbols, and developing safe work habits. Upon successful completion of the program, students are eligible to apply for skilled trades apprenticeships, weld and fabricate metal, read and interpret blueprints, and operate CNC fabrication equipment. Welding is part of the Advanced Manufacturing Academy. Senior students have the opportunity to engage in advanced-elective course work in any of the manufacturing areas: Computer-Aided Design, Precision Machining, Robotics & Automation, and Welding. This opportunity provides students with a more diverse skill-set to enter a career in manufacturing.

Program Highlights:

- Use advanced welding techniques and fabrication equipment to design, engineer and assemble metal components
- Design and fabricate products to solve manufacturing challenges for clients
- Interpret blueprints to meet critical design specifications

The Program Focuses on the Following State Approved Courses:

- Welding Technologies
- Gas Metal Arc Welding
- Shielded Metal Arc Welding
- Flux Core Arc Welding
- Welding & Fabrication
- Advanced Welding
