

ROBOTICS & AUTOMATION

2021-2022

Robotics & Automation provides students with skills applicable to careers in engineering and the industrial field. Students will learn electrical and electronic fundamentals, automated machinery components, and control system design. They'll also learn how to program industrial control devices and robots. Students enrolled in this program can directly enter the workforce in an entry-level capacity, or choose to further their education after graduation. Robotics & Automation is part of the Advanced Manufacturing Academy. Senior students have the opportunity to engage in advanced-elective course work in any of the manufacturing areas: Computer-Aided Design, Precision Machining, Robotics & Automation, and Welding. This opportunity provides students with a more diverse skill-set to enter a career in manufacturing.

Program Highlights:

- Learn the fundamentals of electricity and electronics while exploring how industrial control systems and automations systems are designed and operated
- Program, operate and troubleshoot common industrial control devices used in today's manufacturing industry
- Work with industrial robots and integrate robots with other programmable devices and systems

The Program Focuses on the Following State Approved Courses:

- Robotics
- Industrial Robotics
- Industrial Electricity

COST-FREE COLLEGE CREDIT OPPORTUNITIES

College Credit Plus through Owens Community College

- MET 150: Intro to Industrial Robotics (2 Credit Hours)

Career Technical Assurance Guides (CTAGs)

- CTS001: OSHA 10-Hour Safety (1 Credit Hour)
- CTEET002: Digital Electronics (4 Credit Hours)
- CTEET003: Programmable Logic Controllers (3 Credit Hours)

Articulated Credits through Hocking College – 3 Credit Hours

INDUSTRY-RECOGNIZED CREDENTIALS (POINT VALUES)

- Fanuc-Handling Tool Operation & Programming J2P0310 IACT Approved (6 Points)
- OSHA 10-Hour Training (1 Point)
- Allen Bradley / Rockwell Automation PLC (6 Points)
